	3	1860 Microprocessor Family, Programmer's Reference Manual 1991, Intel Corporation.	
pm	4	1860 Microprocessor Hardware Reference Manual 1990, Intel Corporation.	
		These references all relate to the same Intel microprocessor, 80860. The documents were all offered as evidence in a patent infringement lawsuit involving U.S. patent 5,706,481d owned by Silicon Graphics Inc. The lawsuit claims infringement by making and selling a product including the invention of the present application. The assignee's expert testified that claim 7 of the present invention reads on the William's reference. However, the expert did not know that the claim was from the application, had not read the application, and did not know the meaning of the terms used in the claim in the context of the application. His only context for the meaning of the terms was the William's reference.
